

PREPARATION SYSTEMS

Cut-off machine

**STRUERS
SECOTOM-50**

- Tabletop, precision cut-off machine with movable cutting table and variable speed.
- Automatic feeding with electronic control of feed speed.
- Motorized positioning of cut-off wheel and workpiece and digital read-out.
- 10 cutting methods and cut-off wheel database.
- Complete with recirculation cooling unit and flange set 50 mm (2") dia.

Lapping machine

**STRUERS
TEGRAMIN-25**

Tegamin-25 Automatic is a semi-automated system for lapping and polishing samples, with various types of abrasive both on disk and in suspension, complete with an automatic dosing system.

Mounting press

**STRUERS
CITOPRESS-1**

The Citopress-1 is an embedding press with hot reactive resin. By applying controlled pressure, the press ensures excellent adhesion to the sample of the support material.

Cold mounting systems are also available for heat sensitive or fragile materials.
